

Malice

Early, washable, suitable home french fries

Breeding Station of Comité Nord, France

Registered in 2014 in France

Characteristics of the variety

Crossing Jutlandia x Doline

Maturity Early to mid early
(110 days of vegetation)

Tuber shape Regular oval

Color Pale yellow skin and pale yellow flesh,
very shallow eyes

Dry matter 20 to 21 %

Yield Good yield, good number of tuber, good size

Culinary quality Good ability for cooking and french fries

Culinary group B

Diseases

Foliage late blight and tuber
Moderately susceptible

Resistance Globodera rostochiensis RO1-4

Technical advice

Fertilisation Total nitrogen needs, taking into
account the N from the soil 200 u / ha

Plantation Take out the seed from the cold
storage and wait for the white point of
the sprout, plant in a warm soil,
protection against rhizoctonia is
essential

Recommended plantation density :

Size	Density /ha
28/35	44.000 plants /ha
35/45	36.000 plants /ha
35/55	32.000 plants /ha

Storage

• Good storage ability
