

Nazca

A washable multipurpose ware potato

Breeding Station of Comité Nord, France

Registered in 2010 in France

Characteristics of the variety

Crossing **Idole x Berber**

Maturity **Mid early to medium**

Tuber shape **Oval, with a very regular rounded shape**

Color **Yellow skin and yellow flesh, very shallow eyes, smooth skin**

Dry matter **19 %**, low variation in drought conditions

Yield **Good tuber number, size is very homogenous, high yield**

Culinary quality **Excellent texture, very good culinary quality, suitable for all cooking uses included french fry**

Culinary group **A**

Diseases

Foliage late blight **Moderately susceptible**

Nematod *Globodera rostochiensis* RO1-4
Resistant

Common scab **Slightly susceptible**

Hydric stress **Tolerant**

Technical advice

Fertilisation **Total nitrogen needs, taking into account the N from the soil:
200 u / ha**

Plantation **Take out the seed from the cold storage and wait for the white point of the sprout, plant in a warm soil, protection against rhizoctonia is essential**

Recommended plantation density :

Size	Density /ha
28/35	44.000 plants /ha
35/50	32.000 plants /ha
35/55	29.000 plants /ha

Storage

- Good ability for long storage
